

Employers know that with today's ever-rising health care costs, healthy, productive employees mean a healthier bottom line. For this reason, LabCorp offers services designed to complement employee wellness programs and encourage lifelong healthy habits.

Employee Health and Safety Assessments

LabCorp's comprehensive employee health assessments offer on-site workplace events that may include a blood draw for a comprehensive health panel, blood pressure, colorectal cancer screening, employee wellness education, health coaching, and support services. Employee safety testing options include drug-free workplace, industrial allergy, and biological monitoring and exposure.

We have the ability to customize employee assessments to meet the needs of your organization's employee population. Our comprehensive menu of diagnostic and preventive tests can be combined to achieve your employee wellness objectives.

Why choose LabCorp Corporate Solutions?

- **One Source for:**
 - employee wellness testing
 - employee safety testing
 - drug-free workplace testing
- **Customized programs**
- **Convenient access to services nationwide**
- **User-friendly Web tools for data management**
- **Consistent service**

National Specimen Collection Network

In addition to on-site health events, LabCorp offers specimen collections at many of its more than 1100 patient service centers (PSCs) located throughout the U.S. Our extensive network assures that your employees are never far from a LabCorp network facility.

Appointment Scheduling

Appointment Scheduling can streamline multi-location or remote employee testing. Our scheduling programs offer your staff one point of contact to obtain specimen collection appointments in LabCorp PSCs nationwide.

Diagnostic and Preventive Tests

Cardiovascular Disease and Diabetes Testing

LabCorp offers diagnostic blood tests that assist in the detection of cardiovascular disease risks and diabetes. Test options include total cholesterol, HDL and LDL cholesterol, HDL ratio, triglycerides, glucose and hemoglobin A1c. The vital data provided by these tests can help save employees' lives and reduce long-term health care costs.

Industrial Allergy Screening

Reactions to latex, adhesives, or chemicals can result in employees who cannot work at full potential, increased absenteeism, and additional health care expenses. LabCorp's industrial allergen testing can assist in identifying allergies to prevent lost productivity and allergy-related health care costs.

Additional Testing Options

Biological Monitoring and Exposure Testing

LabCorp offers a comprehensive menu of biological monitoring and exposure testing conducted in its OSHA-certified laboratory. These tests are designed for monitoring workplace exposures to toxic metals and chemicals, including lead, mercury, arsenic, and cadmium, as well as benzene, toluene, PCBs, halogenated hydrocarbons, and chlorinated pesticides.

Drug-free Workplace Testing

LabCorp understands that a healthy, productive workforce begins with a drug-free workplace. Our comprehensive menu of laboratory-based and rapid substance abuse test options are designed to meet the needs of virtually any workplace testing program.
