- **Dedicated support staff**

Building and maintaining a healthy, productive workforce means a healthier bottom line. For this reason, LabCorp offers customizable pre- and post-hire employee screening programs that assist in optimizing workforce productivity. Our comprehensive approach includes drug-free workplace testing, employee health and safety programs, fingerprint capture, and background check services.

Assuring a Safe Working Environment

Drug-free Workplace Testing

LabCorp understands that a healthy, productive workforce begins with a drug-free workplace. Our comprehensive menu of laboratory-based and rapid test options is designed to meet the needs of most workplace testing programs.

Industrial Allergy Testing

Reactions to latex, adhesives, or chemicals can result in employees who cannot work at full potential, increased absenteeism, and additional health care expenses. LabCorp's industrial allergen testing can assist in identifying allergies to prevent lost productivity and allergy-related health care costs.

Biological Monitoring and Exposure Testing

LabCorp offers a comprehensive menu of biological monitoring and exposure testing conducted in its OSHA-certified laboratory. These tests are designed for monitoring workplace exposures to toxic metals and chemicals, including lead, mercury, arsenic, and cadmium, as well as benzene, toluene, PCBs, halogenated hydrocarbons, and chlorinated pesticides.

Fingerprinting and Background Check Services

LabCorp offers fingerprinting services to assist organizations that must submit fingerprints to the FBI for background purposes or for those that choose to conduct fingerprint-based background searches due to the speed and scope of search results. Additionally, through strategic relationships, we offer a comprehensive menu of employment background search services.

Encouraging Lifelong Healthy Habits

Employee Health and Safety Assessments

LabCorp offers services designed to complement employee wellness programs. Our comprehensive employee health assessments offer on-site workplace events that may include a blood collection for a comprehensive health panel, blood pressure, employee wellness education, health coaching, and support services.

Diagnostic and Preventive Tests

We have the ability to customize employee assessments to meet the needs of your organization's employee population. Our comprehensive menu of diagnostic and preventive tests can be combined to achieve your organization's employee wellness objectives.

Providing Exceptional Service

National Laboratory Network

To provide your organization with timely test result turnaround, LabCorp maintains a national network of strategically located laboratories. Specimens are typically routed to the closest certified laboratory from the point of collection.

Rapid Tests

When minutes count, LabCorp's Rapid Test programs offer drugs of abuse screening that is rapid, reliable, and right. Rapid Tests provide on-site screening for drugs of abuse, urine specimen validity, and saliva alcohol, and follow chain-of-custody protocol. LabCorp performs rapid tests in many of its patient service centers (PSCs) nationwide, or customers may choose to perform tests in their own facilities. LabCorp's certified laboratories offer GC/MS* confirmation for nonnegative rapid test drug screens.

National Specimen Collection Network

LabCorp offers drug screen collections at many of its more than 1100 patient service centers (PSCs) located throughout the US. For customer convenience, select PSCs offer both fingerprint capture and specimen collection. Our National Specimen Collection Network provides additional coverage through third-party facilities, assuring that your employees are never far from a LabCorp network facility.

National Specimen Transportation Network

For timely results, LabCorp can arrange direct specimen pick-up from most geographic areas through LabCorp's national, company-owned courier network.

National Customer Care Center

To meet customers' service needs in one location, we maintain a centralized National Customer Care Center available through one toll-free number or via e-mail. Our skilled support staff is dedicated to first-contact resolution.

Toxicology Technical Assistance Line

For inquires of a technical toxicology nature, LabCorp provides a direct toll-free telephone line, the ToxLine, from which customers and their MROs can obtain general technical toxicology information. A representative mans the ToxLine during regular business hours. Toxicology assistance requests may also be submitted via e-mail and a telephone response will be provided.

Innovative Information Technology Solutions

LabCorp offers innovative information technology solutions to meet specific program management needs. Our multiple connectivity options provide customers with secure access to data.

Web-based LabCorp Solutions:
