Fingerprinting Services

- Assists with meeting NASD* requirements
- Enables performance of national background checks independent of employee-supplied information
- Assists with identifying individuals with a breach of trust in their past

*National Association of Securities Dealers

LabCorp Corporate Solutions offers a suite of employee screening services designed specifically for financial organizations. Our drug-free workplace, employee wellness, fingerprinting, and background check services assist financial institutions with optimizing productivity.

Drug-free Workplace Testing

LabCorp understands that a healthy, productive workforce begins with a drug-free workplace. Our comprehensive menu of laboratory-based and rapid test options is designed to meet the needs of most workplace testing programs.

National Laboratory Network

To provide your organization with timely test result turnaround, LabCorp maintains a national network of strategically located laboratories. Specimens are typically routed to the closest certified laboratory from the point of collection.

Rapid Tests

When minutes count, LabCorp's Rapid Test programs offer drugs of abuse screening that is rapid, reliable, and right. Rapid tests provide on-site screening for drugs of abuse, urine specimen validity, and saliva alcohol, and follow chain-of-custody protocol. LabCorp performs rapid tests in many of its patient service centers (PSCs) nationwide, or customers may choose to perform tests in their own facilities. LabCorp's certified laboratories offer GC/MS** confirmation for nonnegative rapid test drug screens.

National Specimen Collection Network

LabCorp offers drug screen collections at many of its more than 1100 patient service centers (PSCs) located throughout the US. For customer convenience, select PSCs offer both fingerprint capture and specimen collection. Our National Specimen Collection Network provides additional coverage through third-party facilities, assuring that your employees are never far from a LabCorp network facility.

On-site Employee Screening

Screening a large population of employees can be challenging. To simplify the process, LabCorp offers on-site specimen collection and employee screening services for drugs of abuse testing and wellness testing.

Employee Wellness

Employers know that with today's ever-rising health care costs, healthy, productive employees mean a healthier bottom line. For this reason, LabCorp offers programs that complement employer wellness programs.

LabCorp has the ability to customize employee health assessments to meet the needs of your organization's employee population. Our comprehensive menu of diagnostic and preventive tests can be combined to achieve your employee wellness objectives.

Fingerprinting Services

LabCorp offers fingerprinting services at select LabCorp locations to assist organizations that must submit fingerprints to the FBI for background purposes or for those that choose to conduct fingerprint-based background searches due to the speed and scope of the search results.

We offer access to a national scheduling center that streamlines the administrative process.

Dedicated Support Staff

To meet customers' service needs in one location, we maintain a centralized National Customer Care Center available through one toll-free number (800-833-3984) or via e-mail. Our skilled support staff is dedicated to first-contact resolution.

Appointment Scheduling

LabCorp's appointment scheduling services can assist in streamlining multi-location and remote hiring. Our scheduling programs offer your staff one point of contact to obtain screening appointments nationwide.

Management Reports

LabCorp offers statistical summary data and result turnaround time reports to assist in workplace testing program management. Customized data management reports are available to meet your organization's unique needs.

Innovative Information Technology Solutions

LabCorp offers innovative information technology solutions to meet specific program management needs. Multiple connectivity options provide customers with secure access to data.
