

## Drug Testing Simplified Through the Power of the Internet

**LabCorp** Corporate Solutions suite of Web-based applications is designed to simplify drug test program management. Access LabCorp Corporate Solutions Web Tools through any Web browser to view specimen status, retransmit specimen results, view laboratory-scanned chain-of-custody (COC) form images, and register donors for collection at a Web COC-capable site. LabCorp Corporate Solutions Web Tools include a Web COC application that guides the specimen collector through each step of the collection process to produce a non-regulated chain-of-custody form on site. Register today to start taking advantage of the convenience, quality, and service of LabCorp Corporate Solutions.

### Convenience

- Direct access enables authorized users to
  - View specimen status
  - View laboratory-scanned COC form images
  - Retransmit final result reports
  - Register donors for non-regulated specimen collections at a Web COC-enabled site
  - Track registered donor specimens from collection through completion of testing
  - Receive e-mail notifications of each completed registered donor specimen collection or donor “no show”
- Web COC collection application eliminates the need to order and stock pre-printed non-regulated COC forms for urine, hair, oral fluid, or rapid drug tests
- Donor registration process creates a unique identification number that the donor may take to the collection site, allowing the collector to simply enter the number and retrieve the donor registration
- Make same-day employment decisions with negative rapid test results reported within minutes of collection through Web COC
- Web COC is ideal for non-regulated post-accident or emergency tests, since the COC form is created on site

**Corporate Solutions** Building a Healthy, Productive Workforce

**LabCorp**, the premier occupational substance abuse testing provider in the nation, delivers a suite of electronic Web-based tools designed to streamline and simplify your employee testing programs.

Please note that LabCorp's Corporate Solutions Web tools are unavailable during daily system maintenance, 8:30 PM to 9:30 PM Monday through Saturday Eastern time and 8:30 PM Sunday to 6:00 AM Monday Eastern time.

Version: 2.0.0 © 2006, Laboratory Corporation of America® Holdings

Access LabCorp Corporate Solutions through any Web browser to view specimen status, retransmit specimen results, view laboratory-scanned chain-of-custody (COC) form images, and register donors for collection at a Web COC-capable site.

## Quality

- Donor registration feature can improve accuracy of data recorded on non-regulated Web COC forms (examples: account/location number, donor demographics, and test(s) requested )
- Collector's name associated with the login user ID is pre-populated in Web COC to ensure that the collector's name is always captured
- Can reduce incidence of incomplete non-regulated COC documentation by means of the Web COC system-guided collection process
- Eliminates illegible handwritten COC entries with the Web COC electronically printed form

## Service

- Evening, weekend, and holiday access to data from any PC with a high-speed Internet connection
- New user access typically processed within 24 hours of request
- Customize Web COC forms by account and location with five-line free-text field feature including preview COC option
- System displays the responsible billing party during the Web COC collection process to expedite AutoPay of specimen collection fees
- LabCorp toxicology technical bulletins are available through the tool and contain information to assist with drug-free workplace testing program management
- For customer convenience, a LabCorp Corporate Solutions Web COC-capable specimen collection site locator is available within the Web tool
- Contact Us feature provides easy access to LabCorp Corporate Solutions Technical Support

The image displays two screenshots of the LabCorp Corporate Solutions web application. The left screenshot shows the 'Find Collection Site' page, which includes a search form with fields for 'Zip Code' (12345) and 'Distance' (15), and a 'Search' button. A sidebar on the left lists various navigation options such as 'Register Donors', 'File Import', 'Modify/Delete Registration', 'Donor Report', 'Global Report', 'Customize Chain of Custody Form', 'Preview Chain of Custody Form', 'Specimen Inquiry', 'Technical Bulletins', 'Find Collection Site', 'Home', 'Help', 'Change Password', 'Contact Us', and 'Logout'. The right screenshot shows the 'Specimen Inquiry' page, which features search criteria fields for 'Registration Number', 'Specimen ID', 'Donor ID', and 'Social Security Number'. It also includes 'Alternate Search Criteria' fields for 'Account Number' and 'Receipt Date'. A note states: '\* Currently, only 6-character account numbers can be searched.' Both screenshots include a 'Search' button and a 'Clear' button. The LabCorp logo and tagline 'Building a Healthy, Productive Workforce' are visible at the top of both pages.

For customer convenience, a LabCorp Corporate Solutions Web COC-capable specimen collection site locator is available within the Web tool
